DESCRIPTORS Boards of Education; Community Characteristics; Comparative Analysis; *Comparative Statistics; *County School Systems; Educational Finance; *Educational Programs; Junior High Schools; Personnel Data; School Statistics; Secondary Education; Staff Utilization; *State Surveys; Statistical Analysis; Student Characteristics; Student Enrollment; Tables (Data); Vocational Counseling; *Vocational Education
IDENTIFIERS *Alabama

ABSTRACT

The report is the first in a series of intended annual publications to provide comparative analysis of the vocational education effort by local boards of education in Alabama. It provides a description of the student enrollment by comparing total enrollment with enrollments in vocational programs. Information is presented in tabular form. County systems are listed alphabetically with city systems listed under counties. The analysis of vocational education programs and related population characteristics by local school for 1973-74 is presented for seven categories: (1) description of students in grades 7-12 enrolled in State/Federal reimbursed vocational education programs; (2) types and availability of junior and senior high school counseling; (3) types and availability of vocational personnel; (4) utilization of vocational education personnel; (5) funding of vocational education; (6) vocational personnel unit entitlements; and (7) post-high school vocational education requirements. The boards are sequenced by size of school population, smallest to largest, to facilitate a comparison of systems of similar size. (Author/KH)

VOCATIONAL EDUCATION PROFILES
BY LOCAL BOARD OF EDUCATION

Auburn, Alabama
October 1975
VT 102 781

FOREWORD

The greatest single resource in Alabama is its people. To maximize this resource, all Alabamians should have an opportunity to learn about the world of work, to explore career opportunities and to develop a marketable skill within their capabilities and desires. Young people who learn a trade or occupational skill are acquiring a background that enables them to live a more productive life and to more fully meet the obligations of their citizenship. There is an urgent need to assist our youth to qualify for employment opportunities and to provide the means whereby workers can keep pace with technological change by updating their skills and, when necessary, by retraining. Vocational Education provides the vehicle for strengthening and extending education to all segments of our society, thereby achieving a more effective utilization of our human resources.

This publication is the first in a series of annual publications which provides a comparative analysis of the Vocational Education effort by local Boards of Education in Alabama. It provides a description of the student enrollment; availability of counseling for students; types, availability, and utilization of vocational personnel; and, data on program funding.

The boards are sequenced by size of school population, smallest to the largest, to facilitate a comparison of systems of similar size.

This publication was prepared under the direction of Dr. Richard A. Baker, Executive Director, State Advisory Council on Vocational Education. Appreciation is expressed to Mr. Bruce A. McDonald, Research Assistant, Mr. Steve Dyess, Clerical Assistant, and Mrs. Janet Brunson, Secretary, for their efforts in preparing this manuscript.
